By Age 7
ch, sh, j, th(v-)

By Age 5
no new
sounds

By Age 8
s, z, v,
th(v+), zh

Speech Sound Development

Based on Sander 1972

Children develop sounds across a large range of ages. This is a guideline only. This chart is based on the ages that 90% of children had acquired these sounds.

Chart created by Katie Pedersen, M.Ed, CCC-SLP for informational purposes only.
